

Real-Time Detection 4-Gas Meter and PID Registry

Updated December 21, 2011

Registered Operators have successfully demonstrated their competency in the information contained in the program's [Body of Knowledge](#) through completion of our written and practical Competency Assessment. Their Registered status is valid until the date indicated (Valid Through); competency must be demonstrated every 2 years to maintain registration. Registration by the AIHA Registry Programs is not a guarantee of the validity of the data generated by a Registered Operator. Ensure that the Operator has any required state and local licensure, prior to performing work. Registration and inclusion on this document does not convey that the Operator is licensed or certified in the indicate state or any jurisdiction.

This registry is, at a minimum, updated after each Competency Assessment. If you have any questions regarding or find any errors with this registry, please contact the AIHA Registry Programs Manger, Carter Dezio, at (703) 846-0798 or cdezio@aiha.org.
